

INNOVATIVE THERMAL COATINGS

INNOVATIVE THERMAL COATINGS:

- We are engaged in providing thermal spray coating services to our clients, which our professionals execute according to their specifications and industry requirements. This process ensures an almost negligible porosity level.
- We use ultra-grade metal, powder, and other raw materials for thermal spray coating by which the durability of the workpiece can be enhanced. These coatings can survive in harsh service conditions, particularly in wear and many corrosion application, abrasion, high temperature, and similar surface functionality requirements.
- All our products are available in various sizes, shapes, models, and designs at market-leading prices to fulfill the demands of customers.
